

Let Our Family Care For Your Family

HIPAA Addendum:

ELECTRONIC MEDICAL RECORDS SYSTEM

We maintain many medical records through a computer database. This system is structured to maintain the privacy of your records in accordance with applicable laws, while allowing access to your records by your other health care providers who utilize the system. Once we enter medical records on the system, if you seek care from another provider who utilizes the same system, the other health care provider may access medical records relating to your treatment here as appropriate to provide you with ongoing care.
