

COVID-19 Vaccine Information for Patients

We all know the impact COVID-19 has had on our personal and professional lives in 2020. Piedmont Family Practice would like to address any concerns or questions regarding the vaccine(s) for the novel virus. We support the vaccine initiative. This recommendation is critical for those patients affected by multiple underlying health conditions as well as protecting the health of those around us.

We know presently that their limited quantities of the vaccine and the supply is supposed to increase in 2021. At this time, we are unaware of allocation, distribution, and arrival date of the vaccines for our area. We have ordered the freezer for appropriate storage and handling, due to arrive in Jan. 2021. Once we are made aware of our anticipated quantity of vaccines, we will provide regular updates for vaccine administration. At this time, we plan on following the CDC and VDH eligibility requirements for distribution to our patients.

Piedmont Family Practice would like to thank you for your diligence and perseverance in wearing your mask, socially distancing, and caring for those around. If you would like additional information regarding COVID-19 vaccine please visit – <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/8-things.html>
